

10—CONTINENTAL DIVIDE

The Great Continental Divide extends from Alaska through the Western United States, Mexico, Central America and South America to Patagonia. From this "Divide" the water (streams) run definitely east or west.

We cross this Highway "66" just about 115 miles west of Albuquerque and 30 miles east of Gallup, N. M. This spectacular view of the Red Rocks is from the village at the Divide.

DIVIDE**

ELEVATION 2,263 FEET

Rainfall divides at this point. To the west it drains into the Pacific Ocean—to the east, into the Atlantic.
